Full Control over your DNS Records

15+ Supported Record Types, including ALIAS

ALIAS (auto resolved alias)

A (host address)

AAAA (IPv6 host address)

CAA (certification authority authorization)

CNAME (canonical name for alias)

MX (mail exchange)

NAPTR (naming authority pointer)

NS (nameserver)

PTR (pointer)

RP (responsible person)

SOA (start of authority)

SPF TXT (sender policy framework)

SRV (service locator)

TLSA (transport layer security authentication)

TXT (descriptive text)

Also included:

DNSSEC zone signing

Root URL forwarding

Subdomain URL redirection

Powerful DNS Management Tools, including Automated Updates

Zone file templates for easy DNS updates

Zone file scheduling for automated DNS updates

Zone file version control for DNS rollbacks and auditing

Zone file import/export for streamlined DNS set-up

Customizable TTL settings

Easy-to-use DNS management control panel

Premium DNS Security and Performance

DNSSEC

for security, authentication and exploit prevention

Secure DNS queries to validate the origin of DNS data, prevent data and message interception, and avoid cache poisoning that can redirect users to fraudulent websites.

Anycast DNS

for speed, load distribution and redundancy

With 20+ globally distributed, fully redundant anycast nodes, websites resolve fast and without interruption worldwide.

Expert DNS Help Whenever You Need It

Webnames' Corporate Account Managers are experts in setting up domains to specification. They can help with everything from implementing DNS settings, to configuring DNSSEC, rolling back DNS changes, and scheduling DNS updates. Consider our team a direct extension of your IT department that can be counted on for expedient, expert DNS support whenever you need it.

100% DNS Resolution + 24/7 Emergency Support

Your business and reputation cannot afford downtime. Webnames Premium DNS is backed by an SLA that guarantees 100% uptime and 24x7 emergency escalation support for corporate clients.

**All Webnames services, core infrastructure, and staff
