

Your domain portfolio, expertly secured and managed to perform

Managing large domain portfolios is complicated. Security, compliance, strategy, nameserver management - it can be tedious, time consuming, and high stakes for brands if something goes

Webnames Corporate protects and promotes your brand online. Our expert account managers, powerful user-platform, and hardened security protocols reduce the risk, complexity, and cost of managing a large domain portfolio.

Maximize the Value of your Corporate Domain Portfolio

Expert Domain Management

From consolidating all your corporate domains into a master account, to processing renewals and managing DNS changes, we transform your portfolio into a well-oiled machine. With experienced account managers available 24/7, we function as an extension of your team.

Hardened Domain Security

We are obsessively security-focused and have built industry-leading tools and systems to protect your domains. Two-factor authentication, IP account lock, registrar and registry locks, hierarchical user roles and account activity reports are just some of the ways we protect your business-critical domains.

Strategy and Consultation

Your digital brands need to be protected and promoted strategically. From domain acquisitions, to proactive brand monitoring and defensive registrations, our experts implement policies to support your business goals and reduce risk.

Powerful Dashboard

Whether your portfolio has 100 or 10,000 domains, our intuitive dashboard and account management tools give you the oversight, power and flexibility to make timely updates and accurate decisions. With bulk tools, multi-user support and multiple permission levels, in-house administrators have all the control they need.

Portfolio Audit and Reviews

Our domain portfolio audit and proactive account reviews provide data-driven insights and expert recommendations to help contain costs and uncover value. We assess, categorize and report on how your domains are being used, identify areas of opportunity and risk, ensure data integrity and compliance with registry requirements.

Financial Forecasting and Flexible Billing

We make the financial side of things simple by providing invoicing, separate billing across business units, comprehensive statements of account and quarterly forecasting. Our finance team will work with you to tailor a custom solution.

Why Trust Your Domain Portfolio to Webnames?

Webnames Corporate Services manages domain portfolios for more of Canada's top brands, organizations and law firms than any other registrar, including Canadian Tire, MEC, Loblaws, Shaw, Post Media, National Bank, among others. We're 100% Canadian, have a 19-year strong A+ BBB rating, and true industry veterans with a history that dates back to the founding of the .CA extension in 1987.
